

# How to add MyHealthCheck to your home screen

MyHealthCheck is a progressive web app, that means it can be used in your web browser as a normal website, but also added to your Home screen and used like a native application.

To add MyHealthCheck to your Home screen, follow these easy steps:

## iOS

### Tap the Action icon

When the MyHealthCheck page is loaded, tap the  icon at the bottom of your screen.

## Android

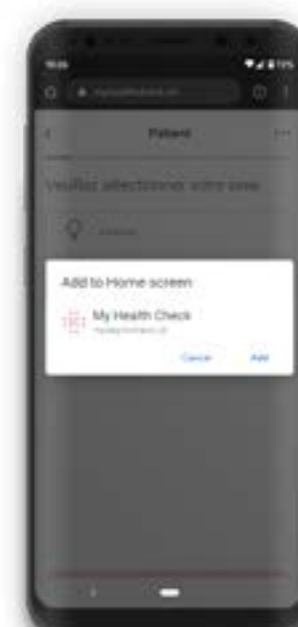

### Tap “Add MyHealthCheck to Home screen”

When you open MyHealthCheck in your browser, a small banner appears at the bottom of the screen that allows you to add MyHealthCheck to your Home screen. Tap on it.

### Tap the “Add to Home Screen”

Scroll down until you see the “Add to Home Screen” button and tap on it. Confirmation screen will pop up.

### Tap the “Add” button on the “Add to Home screen” modal

When you tap on the banner, a modal window will appear at the center of the screen. Tap on “Add” and the system will create a MyHealthCheck icon on your Home screen automatically.

### Add MyHealthCheck to Home Screen

You can preview the MyHealthCheck web app icon, title and website address. At the top right corner tap the “Add” button to confirm the action and add MyHealthCheck to Home Screen.

### MyHealthCheck icon is now on your Home screen.

The application icon is now available on your Home screen. You can now use MyHealthCheck as a regular application.
